## Project Summary

### Objectives

The project AES - Alternative Economy for Sustainability aims to provide youth workers with the basis of a green economy to develop activities on environmental awareness for young people. One of the main themes of the project is circular economy: YW will learn how the cycle of the objects work and they will be trained on how to apply fundamental rules of circular economy in daily life. The training will also provide YW with the tools and methods to share the acquired knowledge with youngsters. This will improve the ability of the YW to raise awareness on sustainability in their local areas.

The project's objectives are: to equip youth workers with the knowledge and skills needed to promote environmental sustainability, to increase the know-how of the YW in order to to raise awareness on green economy and circular economy in their local areas, to improve YW abilities in creating activities on sustainability feasible for young people.

### Activities

The project AES - Alternative Economy for Sustainability will involve 30 Youth Workers, from 6 different countries (Cyprus, Romania, Hungary, Armenia, Egypt, Russian Federation .) The age range of the participant is

between 25 and 30 years old. Participants are Youth Workers from the staff of the NGOs partners of the project. Youth Workers who will participate have a strong interest in green economy and they will be involved in the creation of specific activities for youngsters in order to raise environmental awareness on green and circular economy in their local areas.

There will be different kinds of activities implemented during the project, such as debates on waste, workshops on recycling, best practices sharing, workshops on second hand clothes, round table on circular economy and informative/entertaining games on object cycle.

### Impact

The results of the project AES - Alternative Economy for Sustainability for the target group of YW are:

- increased knowledge on green economy
- increased understanding of the cycle of an objects
- improved ability to share knowledge on environmental awareness
- improved motivation in acting in a green way
- increased ability to develop events and activities on environmental awareness for youngsters

In addition the project will bring to the creation of a strong network of partners which are willing to cooperate further in the future on other projects based on environmental issues.

The project will positively impact:

- 1) the YW, who will be able to increase their knowledge and competencies on green economy and circular economy. YW will also be trained on how to share this knowledge to other people, in particular youngsters of their local areas.
- 2) the partner NGOs, as they will have a more prepared staff to promote activities on the green economy. In addition, partners of the project will have the possibility to create a stable

network of NGOs that could further work on environmental projects.

3) the youngsters of the local areas of the partners, as they will benefit from the higher quality of the events in the environment that will be promoted by the trained YW
